EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems

New York, NY

Master of Science (MS) in Computer Science | GPA: 4.0

New York University, College of Arts and Science

New York, NY

Bachelor of Arts (BA) in Comparative Literature | GPA: 3.7

CERTIFICATIONS

AWS Certified Solutions Architect - Professional

June 2026 – June 2029

AWS Certified Developer - Associate

July 2023 – July 2026

AWS Certified Cloud Practitioner

October 2021 – July 2029

TECHNICAL SKILLS

Programming Languages:

Go, Python, Bash

Tools:

Kubernetes, Terraform, Git, Docker, Gitlab

PROFESSIONAL EXPERIENCE

Datadog

March 2021 – Present

New York, NY

Software Engineer II

October 2024 – Present

- Leveraging [Crossplane](#) to establish a Kubernetes-based control plane for provisioning and managing multi-cloud resources
- Improving and operating a fork of [Lemur](#) to automate end-to-end TLS/SSL certificate issuance, rotation, and lifecycle management across multi-cloud infrastructure
- Employing Linux CLI utilities and bash scripting to diagnose network bottlenecks, triage incidents, and automate remediation workflows
- Enhancing and maintaining CI/CD tooling for a shared Terraform repository including automated Terraform plan and apply operations, code linting, and cloud provider integrations such as AWS Access Analyzer for flagging notable IAM changes

Software Engineer

November 2023 – October 2024

- Developed a Go-based self-service API enabling internal teams to provision and manage object storage with IAM access across AWS, Azure, and GCP
- Designed and improved flexible Terraform modules enabling scalable, repeatable, and secure cloud resource management.

Premier Support Engineer

January 2022 – November 2023

- Conducted in-depth debugging and problem solving to provide effective issue resolution and best in class technical support
- Built virtual environments using local Kubernetes providers, Docker, and VirtualBox to reproduce issues and test solutions

Solutions Engineer

March 2021 – January 2022

- Supported the Datadog platform through tickets, live troubleshooting and chat sessions by providing technical advice and observability best practices to our clients
- Delivered product demonstrations to prospective customers that highlight the value of our SaaS platform

Rockefeller Capital Management

July 2020 - March 2021

New York, NY

Analyst

- Built a REST API in Python for calculating a portfolio's ex-post risk statistics from financial return streams in an Azure data lake as an in-house solution for asset management and private wealth advisory teams

OPEN-SOURCE CONTRIBUTIONS

Cluster API (Kubernetes SIG)

December 2023 – December 2024

Release Lead ([v1.7.0](#) minor release cycle)

- Coached and supported release team members in troubleshooting CI failures, improving release processes/documentation, conducting weekly meetings, ensuring releases were cut on schedule and successfully delivered the [v1.7.0 minor release](#)

CI Signal Lead ([v1.9.0](#) minor release cycle)

- Identified failed jobs, validated fixes, and drove status-gating decisions to ensure high-quality stability at release time.
